

**What You
Think About
Expands.**

The Value of Affirmation

A Belief is a Very Specific Kind
of Creative Attention to a Paradigm that in the
Believer's Mind is Evidenced in Experience
as Telltale Stories Relevant to
the Paradigm Itself.

The Believer Works Tirelessly, Consciously
and Unconsciously, to Prove the Paradigm Out by
Creating Stories (Experiences) that Justify
the Believer's Position.

Thus the Value of the Belief-Statement Affirmation.
Change Your Beliefs and Your Experiences
Change with Them.
